

netwatch

proactive video monitoring

What is Netwatch Proactive Video Monitoring?

Detect and deter crime with Netwatch Proactive Video Monitoring. An event-based live video monitoring service that combines video analytics software, a team of US-based intervention specialists, and live audio talk down for one powerful security solution.

The Netwatch service helps maintain business continuity and lowers your liability when compared to other video monitoring solutions. At the same time the service provides an enhanced user experience, 90% savings over security guard expenditure, and real-time response, for proactive rather than reactive security.

Common Applications for Netwatch Proactive Video Monitoring

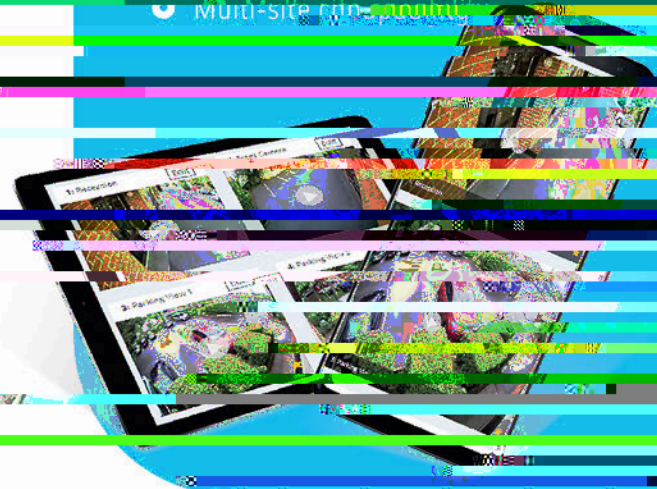

The Netwatch service is designed for a wide range of applications, from crime detection, making it an effective solution for large properties and multi-facility sites to:

- Provide a Safe Work Environment
- Protect Assets
- Ensure Business Continuity
- Manage Costs Related to Effective Security
- Augment Security Guard Services

Netwatch CORE

Netwatch CORE is a truly unique feature. An interactive platform... which gives the user full control and visibility of the Netwatch service through an app.

- Flexible zoning based on business needs
- Authorization levels for users
- Remote arm & disarm capability
- Visitor access
- Health check notifications & service requests
- Multi-site capabilities
